

Chip 3-Terminal EMI Filter – MFL Series

Operating Temp. : -40°C~+85°C

FEATURES

- Multilayer structure and low profile enables high density mounting
- Crosstalk is prevented due to closed magnetic circuit
- Steep attenuation characteristics achieves effective noise suppression

APPLICATIONS

- Noise suppression in visual signal such as DVD, DSC, LCD, PDP, etc
- Suppression of high magnitude radiated noise generated by high speed digital circuits such as clock line
